

COLEGIO GIOCOSA CICLO ESCOLAR 2020-2021

NATALIA VOMEND DE ANDA

INGLÉS AZUL

PRIMARIA

I am 28 years old. I am a happy and positive girl, willing to live new experiences all the time; to know the unknown and to be risky.

I'm a Pedagogue from Universidad Panamericana. I really enjoy teaching; every day is an adventure when it comes to children and I believe there are a lot of different fun ways to learn. This is my first year at Colegio Giocosa and I'll be teaching 1st, 2nd and 3rd grades.

I am a fanatic of art and going to the movie theatre. I also enjoy eating and trying new places with family and friends. But my favorite thing to do is to read children's books, I find it very interesting and fulfilling; nowadays there are several authors who reflect about actual situations and through their writing they can help us shape sensitive and aware children for the world.

Through reading, children can acknowledge feelings, emotions and thoughts that they may be finding hard to understand or explain; they can learn everything without knowing that they are learning. So we're gonna be reading a lot.

We're also gonna be learning a lot about and through art. Art and education are integrated into a common commitment: to form the children's identity, not as an individual singularity, but as an autonomous, free and conscious construction.

There is going to be homework sometimes; it's important for the student to challenge him/herself without the teacher or peer's help, not as an evaluation, but to see where we all are in the process of each lesson.

I'm not a fan of exams so I'll try to evaluate through projects, presentations, team evaluations, rubrics and some other fun ways to know how we are learning.

I am very happy and excited to work with your kids and learn from them as well!
